**Subject:** MS Case Settlement does not go far enough

What about the damage caused by Microsoft's monopolistic practices?

Many companies have been either put out of business or reduced to a niche market.

The settlement does nothing to address the damage already done.

It is too little too late. The damage is done. Microsoft is a stronger monopoly because of their illegal practices. Why wouldn't any other company practice the same crimes when they will come out ahead anyway?

Microsoft needs to be held accountable for past actions and the effects of their actions.
